

We're testing with the Clarifi COVID-19 Saliva Test

Feel confident in sending your child back to school knowing we've partnered with Quadrant Biosciences to use their Clarifi COVID-19 Saliva Test. Their method of pooled testing has been used at more than 100 universities, K-12 schools, nursing homes, and municipalities across the state.

- 1** The Clarifi COVID-19 test is a safe and easy to administer self collection swab. [Click here](#) to see how the saliva collection process works.
- 2** Easy access to results in the Clarifi web application, allowing our school administrators to make quick, informed decisions. Register your child at home before they get to school by visiting clarifi-covid-19.com. [Click here](#) to watch a step-by-step tutorial video.
- 3** The Clarifi COVID-19 Saliva Test is the most sensitive saliva test currently on the market! That means it may detect the virus in more patients, resulting in fewer false negatives. Also, it can detect all currently known variants, including the Delta variant.
